

CLEAN Your
Storage Area.

CLEAN Recycling Program:

CLEAN is an equipment removal and recycling program for facilities who value both floor and local landfill space.

More than 5.9 million tons of Medical Waste is produced annually. Be part of the solution. Recycle your equipment.

In 2020, Didage was able to recycle more than 53 tons of medical equipment. With your help, we can accomplish even more.

How it Works

- We remove everything you wish to eliminate and recycle from your storage rooms.
- Our team will work with your facility's schedule to ensure no disruptions occur for your team or your patients while equipment is being removed.
- The equipment is brought back to Didage to be sorted. Obsolete items are broken down and recycled.

Levels of Recycling:

Excellent: Item is repairable and reusable in current state. (Rebuilt and sold with original product intent)

Good: Item can be used outside or limited use of original intent (Sold/Donated to 3rd world countries or missions' organizations.)

Poor: Item can be broken down for repair parts (Reusable with limited original product intent)

Recycle/Disposal: Disassembled for specific recycling (Metals, plastics, glass, etc.)
